

Alufluor's Environmental Policy

The environmental policy shall show all interested parties how Alufluor regards their environmental work and what Alufluor wants to achieve.

Alufluor AB, shall be regarded by all their interested parties as a company carrying out active environmental work under good economical forms with the aim to minimise and prevent negative environmental impacts from its activities.

This means

- That legislation and the authorities' rules are only minimum demand for us
- That our work shall have long-term aims, be sound and carried out with high quality at the same time as we are striving to reach cyclic solutions
- That our surrounding neighbours shall get the sound impression that we are an open and far-sighted company
- That our activities shall be carried out with the ambition to minimise all negative environmental influences by continuous improvements
- That all employees have the right, and the obligation, to ensure that the Environment has priority
- That we are constantly striving to reduce our emissions to air and water as well as deposited quantities

Helsingborg October 29, 2008

Anders Wyndhamn
Managing Director
